Churchville, VA 24421

CHIMNEY CAPS:

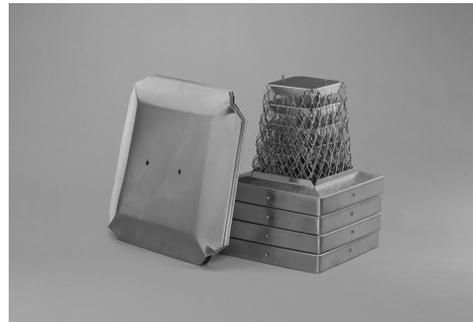

Why do I need a single or multi-flue chimney cap?

- **Prevent bird and animal invasion:** Chimney caps protect your chimney from nesting birds, squirrels, raccoons, and other disease carrying animals.
- **Protect against airborne embers and sparks:** Chimney caps have mesh that reduces the risk of fires caused by embers and sparks exiting from your chimney flue.
- **Guard against flue blockage:** Leaves and debris entering your chimney can cause flue blockage and lead to fire, smoke damage, or even carbon monoxide spilling back into your home.
- **Eliminate moisture damage:** Water entering your chimney erodes masonry and will cause your damper or firebox to rust out. This leads to expensive repairs.

SINGLE FLUE CAPS

are constructed of 18 gauge 304 stainless steel with a 3/4" expanded stainless steel mesh. These caps mount to the outside of the flue tile providing greater free air space for better draft.

PREMIER TOP MOUNT MULTI-FLUE CAPS

National Chimney Supply stocks the most sizes of stainless steel multi-flue caps in the industry. The multi-flue cap has a top mount design that easily attaches to the top of the chimney crown or brick with chimney top adhesive and tapcons (included with each cap). All Premier Top Mount Multi-Flue Caps have a hinged mounting system that gives extra space for a tight fit.
